

Planting native doesn't only make a beautiful landscape; it provides vital habitats, food, and shelter for wildlife. Native plants are already adapted and will thrive in our environmental conditions, saving you time, water, and money.

Don't miss out on our vast selection of perennials, great stock of larval plants, grasses, vines, and edibles for wildlife and people! **Be sure to follow us on Instagram.**

*Phlox paniculata* (Pink Garden Phlox) is a deer resistant perennial that offers the perfect pop of color to any landscape while attracting bees, butterflies and moths.

150 – 1g available \$2.35

The silvery foliage of the *Pityopsis graminifolia* (Golden Aster) is an attractive addition to any wildflower garden even when the yellow flowers (pictured above) are not in bloom.

250 – 1g available @ \$2.35 each

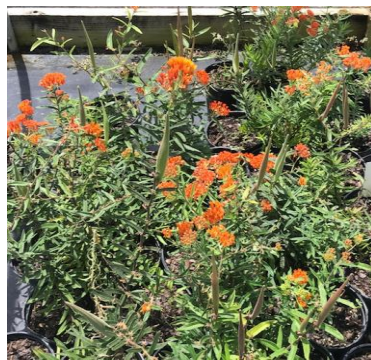

The beautiful purple spikes of the *Lobelia siphilicita* (Great blue lobelia) attract both hummingbirds and butterflies. Is a great companion plant for *Lobelia cardinalis* (Cardinal flower)  
1g – 300 \$2.35

*Lobelia cardinalis* (Cardinal flower) is a moisture loving perennial that attracts hummingbirds and butterflies. These spikes, some reaching 4ft when in bloom, will be putting on showy red flowers soon.  
500 1g available @ \$2.35 each

*Asclepias incarnata*

*Asclepias tuberosa*

*Asclepias perennis*

Our Milkweeds bring all the butterflies to the yard.  
Several varieties are available in 1g @ \$2.95 each.

Lonicera X heckrottii 'Gold Flame' (Honeysuckle) has vibrant, multi-colored flowers. This vine is semi-evergreen in the south and a vigorous grower; making it perfect for trellises or arbors. 1g available @ \$3.10 each & 3g @ \$6.75

Aster divaricata (White wood aster) is a great groundcover that will produce abundant adorable white flowers from July until September. 1g – 200 @ \$2.35 each

We love the attention grabbing red flowers on Hibiscus coccineus (Scarlet Hibiscus) 400 – 1g available \$2.35 each

Our *Liatris spicata* (Blazing Star) are getting ready to put on quite a show!  
1g – 1,000 @ \$2.35 each

*Solidago eracta* (Erect Goldenrod) is a great addition to a late summer/fall landscape. Will attract many pollinating insects and butterflies. Pairs well with any of our liatris species. 100 1g available @ \$2.35 each

*Asimina triloba* (Pawpaw) is a great small native tree. Edible fruit has a tropical flavor.  
Also a host plant for Zebra Swallowtail. 3g available @ \$8.75 each

*Monarda punctata* (Dotted horsemint) may not be as showy as some of our other perennials, but it is still loved by a huge assortment of pollinating insects.  
200 – 1g available @ \$2.35

*Passiflora incarnata* (Passionvine) is a great butterfly nectar plant as well as a larval host for the Gulf Fritillary butterfly. 1g - 300 \$2.85 (staked)

Edible alert! *Fragaria virginiana* (Native Strawberry) offers delicious berries and beautiful red fall color. 1g - 250 available @ \$2.35 each

*Eragrostis elliottii* (Elliotts lovegrass)

*Muhlenbergia capillaris* (Muhly)  
(picture denotes bloom color)

*Panicum virgatum* 'Heavy Metal'

Planting native grasses is for the birds....Literally! These low maintenance landscape additions provide abundant seeds that birds enjoy. Attractive in small or mass plantings. Large selection of 1g grasses available @ \$2.10 each

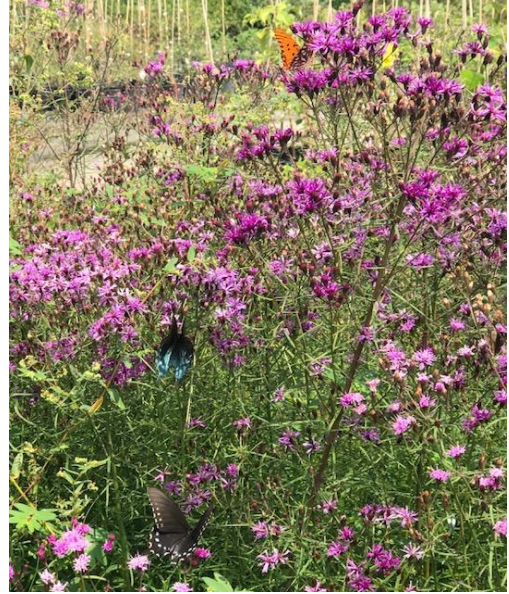

Although our *Iris cristata* (Dwarf crested iris) are not in bloom right now, they look great! These plants love partial shade and are beautiful spring bloomers (see pictured above).  
600 - 1g available @ \$2.95 each

Need a background for your native planting? *Viburnum dentatum* (Arrowwood viburnum) is a low maintenance shrub that is a host for the Spring Azure butterfly and the berries attract a variety of birds, including turkey and quail.  
1g (\$3.25), 3g (\$7.75) & 7g (\$20.00)  
sizes available

Can you spy all three types of butterflies enjoying our *Vernonia angustifolia* (Ironweed)? 150 – 1g Available \$2.35 each

Do you have a hot, dry area? Then *Helianthus debilis* (Dune Sunflower) is the plant for you. This spreading perennial is a great ground cover that attracts butterflies. 200 available @ \$2.35 each

When mentioning groundcovers you can't leave out *Mimosa strigillosa* (Sunshine mimosa). Nice semi-evergreen for shade or full sun. This host plant for butterfly larvae offers small powderpuff blooms from spring until fall. Blooms are also great for attracting butterflies. 400-1g available @ \$2.35 each

*Dyschoriste oblongifolia* (Twinspur) is another nice groundcover that blooms throughout the summer. Thrives in either partial shade or full sun and is drought tolerant. Attracts butterflies and bees and is the host plant for the Common Buckeye. 150 – 1g available @ \$2.35 each.

The cheerful yellow flowers of the *Silphium astericus* (Starry Rosinweed) reach 3 feet tall and offer great butterfly nectar plant. Loved by Swallowtail butterflies, honeybees, and many other pollinators. 200 – 1g available @ \$2.35 each.
